

# R&D Microfluidics Engineer

 Lunaphore Technologies SA

 Tolochenaz (Vaud), Switzerland

**Job title:** R&D Microfluidics Engineer

**Reports to the:** VP Instrument Development

**Activity rate:** 100%

**Type of contract:** Permanent contract

**Start date:** August 2021 or later

**Duration:** Permanent

## About our company

Lunaphore Technologies is a young scale-up active in the Life Sciences field developing products based on a microfluidic technology to analyze tissue samples in immuno-oncology research. Lunaphore is seeking a highly motivated candidate to join our team and contribute directly to the development and growth of the company.

## Job overview

We are looking for a 'R&D Microfluidics Engineer' to strengthen our engineering team.

## Responsibilities and duties

You are working in a multidisciplinary team in collaboration with engineers and biologists. Your main activities are the following:

- Design and develop next generation microfluidic consumables for immunofluorescence staining.
- Design and perform tests of the consumable, create test setups, collect data, and present it.
- Manage the relationship with the partners for industrialization and production of the microfluidic consumable portfolio.
- Explore innovative concepts in collaboration with the marketing team, with assay development scientists and software developers.
- Contribute to, maintain, and improve the quality system in order to comply with all applicable regulation and standards, especially with ISO 9001.

### Required qualifications

- MSc in microtechnology or a similar field.
- At least 2 years of experience in a similar position.
- Previous experience in the design and tests of microfluidic consumables a strong plus.
- Proficient in French or English at least C1.

### Required soft skills

- Proactive personality, ready to accept new challenges.
- Ability to interact and work in a team.
- Capacity to adapt in a constantly changing environment.

### We offer

- A young and strong-growing high-tech company.
- A diverse and international working environment with a strong network.
- A highly interactive team with strong personal and technical qualities.
