

# Verification and Validation

## Project Coordinator

**Reports to:** Program Manager **Type of contract:** Fixed term (8 months) **Start date:** 01.02.2022

Are you an experienced Project Coordinator with good knowledge in Verification and Validation, looking for an exciting challenge where you can have an impact on the future product release and product sustaining of your company?

### About us

Lunaphore Technologies is a company born with the vision of accelerating cancer research, by making spatial biology mainstream in every research laboratory. We build solutions that simplify technology adoption for discovery and translational research laboratories and empower researchers to develop better targeted treatments for cancer and other diseases.

To support our future growth, we are looking for a highly motivated and dynamic individual to join our team!

### Your Missions

Reporting directly to the Program manager, you will lead the Verification and Validation (V&V) from A to Z.

- Preparation, execution and monitoring of the V&V activities of all products to ensure requirement fulfillment.
- Write and review V&V validation tests and reports, including appropriate testing methods, acceptance criteria and result discussions.
- Coordinate verification and integration tests among the developers, engineers and scientists and monitor progress.
- Participate in the development of products through stages of design inputs to design outputs and transfer, acting as a key team member interacting with development engineers.
- Act as a key team member in the risk analysis for all products, regarding product efficacy and safety.
- Participate in change management process to assess V&V needs.
- Contribute to maintain and improve the quality system to comply with all applicable regulation and standards, especially with ISO 9001.

### Your ideal profile

- MSc. in biomedical engineering, life sciences, microtechnics or similar field.
- A validated experience of at least 3 years in a similar position, experience in Verification and Validation.
- Ability to interact with multidisciplinary teams, good communication skills.
- Dynamic, enthusiast and organized individual, able to multi-task and work in a fast-paced environment
- Organizational skills and attention to details
- Proficiency in English (at least C1), French is a plus.

### What we offer

- A dynamic company where you can have a real impact
- An environment where you will be able to grow both professionally and personally
- Collaborate every day with a young, interactive, and motivated team

Are you passionate about making spatial biology mainstream and empowering researchers? Us too!
