

# Labelling and Packaging Specialist

**Reports to: Application Development Team Leader**

**Type of contract: Permanent**

**Start date: ASAP**

**Part time: 80%**

We are looking for a 'Labelling and Packaging Specialist' to develop and transfer labelling and packaging solutions from R&D to Manufacturing for all reagents and buffers products.

## About us

Lunaphore Technologies is a company born with the vision of accelerating cancer research, by making spatial biology mainstream in every research laboratory. We build solutions that simplify technology adoption for discovery and translational research laboratories and empower researchers to develop better targeted treatments for cancer and other diseases.

We are looking for a highly motivated and dynamic individual to join our team and contribute directly to the development and growth of the company!

## Your Missions

- Write related documentation for newly developed buffers and reagents according to local and international regulations
- Develop packaging and labelling solutions in collaboration with other departments and external suppliers
- Understand reagent/buffer development to anticipate needs in documentation, labelling, and packaging
- Communicate clearly with other departments about reagent/buffer development to anticipate needs in term of commercial agreements, documentation, packaging, volumes, transportation, etc.
- This position reports to the Application Development Team Leader

## Your ideal profile

- Degree in Chemistry, Bioengineering, Biomedical Engineering, or a related field
- 2-3 years of industrial experience in R&D, Supply Chain, or Manufacturing
- Experience in reagent/buffer regulatory documentation and/or packaging solution development
- Experience in with local and international regulation in the field, e.g. Swissmedic, EMA, MDR, FDA, etc.
- Experience in reagent/buffer development is a plus
- Experience with designing software is a plus (e.g. Adobe Illustrator, InDesign, or similar)
- Ability to collaborate with others by working in a team, share information with peers and managers
- Interest in interdepartmental collaborations and in the stakes of reagent/buffer development
- Fluency in oral and written English is a must

## What we offer

- A dynamic company where you can have a real impact
- An environment where you will be able to grow both professionally and personally
- Collaborate every day with a young, interactive, and motivated team

Are you passionate about making spatial biology mainstream and empowering researchers? Us too!
