

# Software Development Intern

**Reports to:** Software Lead Developer    **Type of contract:** Internship    **Start date:** ASAP  
**Duration:** 6 months

## About us

Lunaphore Technologies is a company born with the vision of accelerating cancer research by making spatial biology mainstream in every research laboratory. We build solutions that simplify technology adoption for discovery and translational research laboratories and empower researchers to develop better-targeted treatments for cancer and other diseases.

We are looking for a Software Intern for 6 months who would contribute to developing internal tools, proofs of concept & demonstrators and QA activities.

## Your Missions

Reporting to the Lead Software Developer, you will contribute to:

- The development of a proof of concept of an image analysis
- The testing of the different software solutions developed in-house
- The elaboration of proof of concept to demonstrate concepts and methods

## Your ideal profile

- Experience in a Machine Learning framework
- Good knowledge of a modern programming language (Python, C#, Java or similar)
- Experience in image processing
- Federal Certificate in IT or an ongoing Bachelor/ Master's degree in Computer Science or equivalent

## What we offer

- A dynamic company where you can have a real impact
- An environment where you will be able to grow both professionally and personally
- Collaborate every day with a young, interactive, and motivated team
- A diverse and international working environment

Are you passionate about making spatial biology mainstream and empowering researchers? Us too!
