

SAFETY DATA SHEET

Blocking Buffer Kit, Solution 1

Section 1. Identification

Blocking Buffer Kit, Solution 1	: Product name
BU10	: Product code
Not available.	: Other means of identification
Professional use. Use in laboratories: Research.	: Product use
Lunaphore Technologies SA Route de Lully 5C, CH-1131 Tolochenaz, Switzerland + 41 800 84 86 89 support-tech@lunaphore.com	: Supplier's details
CHEMTREC: +972 3-763-0639 (Local)	: e-mail address of person responsible for this SDS
	: Emergency telephone number

Section 2. Hazard identification

Classification of the substance or mixture

Mixture : Product definition

Classification according to Regulation (EC) No. 1272/2008 [CLP/GHS]

Skin Irrit. 2, H315
 Eye Irrit. 2, H319
 STOT SE 3, H335

The product is classified as hazardous according to Regulation (EC) 1272/2008 as amended.

See Section 16 for the full text of the H statements declared above.

See Section 11 for more detailed information on health effects and symptoms.

Label elements

: Hazard pictograms

Warning

: Signal word

H315 - Causes skin irritation.

: Hazard statements

H319 - Causes serious eye irritation.

H335 - May cause respiratory irritation.

Precautionary statements

 P280 - Wear protective gloves, protective clothing and eye or face protection.

: Prevention

 P261 - Avoid breathing vapor or spray.

 P264 - Wash hands thoroughly after handling.

 P304 + P312 - IF INHALED: Call a POISON CENTER or doctor if you feel unwell.

: Response

 P305 + P351 + P338 - IF IN EYES: Rinse cautiously with water for several minutes.

Remove contact lenses, if present and easy to do. Continue rinsing.

 P337 + P313 - If eye irritation persists: Get medical advice or attention.

 Not applicable.

: Storage

 Not applicable.

: Disposal

2-amino-2-(hydroxymethyl)propane-1,3-diol hydrochloride
trometamol

: Hazardous ingredients

Section 2. Hazard identification

Not applicable.

: Supplemental label elements

Not applicable.

: Annex XVII - Restrictions on the manufacture, placing on the market and use of certain dangerous substances, mixtures and articles

2.3 Other hazards

This mixture does not contain any substances that are assessed to be a PBT or a vPvB.

: Product meets the criteria for PBT or vPvB according to Regulation (EC) No. 1907/2006, Annex XIII

None known.

: Other hazards which do not result in classification

Section 3. Composition/information on ingredients

Mixture

: 3.2 Mixtures

Type	Classification	%	Identifiers	Product/ingredient name
[1]	Eye Irrit. 2, H319	50 - 55	EC: 231-598-3 CAS: 7647-14-5	sodium chloride
[1]	Skin Irrit. 2, H315 Eye Irrit. 2, H319 STOT SE 3, H335	30 - 40	EC: 214-684-5 CAS: 1185-53-1	2-amino-2-(hydroxymethyl)propane-1,3-diol hydrochloride
[1]	Skin Irrit. 2, H315 Eye Irrit. 2, H319 STOT SE 3, H335 See Section 16 for the full text of the H statements declared above.	5 - 20	EC: 201-064-4 CAS: 77-86-1	trometamol
Specific Conc. Limits, M-factors and ATEs			Product/ingredient name	
-			sodium chloride	
-			2-amino-2-(hydroxymethyl)propane-1,3-diol hydrochloride	
-			trometamol	

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment, are PBTs, vPvBs or Substances of equivalent concern, or have been assigned a workplace exposure limit and hence require reporting in this section.

Type

[1] Substance classified with a health or environmental hazard

Occupational exposure limits, if available, are listed in Section 8.

Occupational exposure limits, if available, are listed in Section 8.

Section 4. First aid measures

Description of necessary first aid measures

Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Get medical attention.

: Eye contact

Section 4. First aid measures

- Remove victim to fresh air and keep at rest in a position comfortable for breathing. : **Inhalation**
 If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Get medical attention. If necessary, call a poison center or physician. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband. In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours.
- Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Continue to rinse for at least 10 minutes. Get medical attention. Wash clothing before reuse. Clean shoes thoroughly before reuse. : **Skin contact**
- Wash out mouth with water. Remove dentures if any. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not induce vomiting unless directed to do so by medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Get medical attention if adverse health effects persist or are severe. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband. : **Ingestion**

Most important symptoms/effects, acute and delayed

Potential acute health effects

- Causes serious eye irritation. : **Eye contact**
 May cause respiratory irritation. : **Inhalation**
 Causes skin irritation. : **Skin contact**
 No known significant effects or critical hazards. : **Ingestion**

Over-exposure signs/symptoms

- Adverse symptoms may include the following: : **Eye contact**
 pain or irritation
 watering
 redness
- Adverse symptoms may include the following: : **Inhalation**
 respiratory tract irritation
 coughing
- Adverse symptoms may include the following: : **Skin contact**
 irritation
 redness
- No specific data. : **Ingestion**

Indication of immediate medical attention and special treatment needed, if necessary

- In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours. : **Notes to physician**
- No specific treatment. : **Specific treatments**
- No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. : **Protection of first-aiders**

See toxicological information (Section 11)

Section 5. Fire-fighting measures

Extinguishing media

Use dry chemical, CO₂, water spray (fog) or foam. Use an extinguishing agent suitable for the surrounding fire.

: **Suitable extinguishing media**

Do not use water jet.

: **Unsuitable extinguishing media**

In a fire or if heated, a pressure increase will occur and the container may burst.

: **Specific hazards arising from the chemical**

Decomposition products may include the following materials:

carbon dioxide

carbon monoxide

nitrogen oxides

halogenated compounds

metal oxide/oxides

hydrogen chloride gas

: **Hazardous thermal decomposition products**

Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training.

: **Special protective actions for fire-fighters**

Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

: **Special protective equipment for fire-fighters**

Section 6. Accidental release measures

Personal precautions, protective equipment and emergency procedures

No action shall be taken involving any personal risk or without suitable training.

: **For non-emergency personnel**

Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Avoid breathing vapor or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment.

If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".

: **For emergency responders**

Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).

: **Environmental precautions**

Methods and materials for containment and cleaning up

Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.

: **Small spill**

Stop leak if without risk. Move containers from spill area. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.

: **Large spill**

Section 7. Handling and storage

Precautions for safe handling

Put on appropriate personal protective equipment (see Section 8). Do not ingest. Avoid contact with eyes, skin and clothing. Avoid breathing vapor or mist. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Empty containers retain product residue and can be hazardous. Do not reuse container. : **Protective measures**

Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures. : **Advice on general occupational hygiene**

Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Store locked up. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use. : **Conditions for safe storage, including any incompatibilities**

Section 8. Exposure controls/personal protection

Control parameters

Occupational exposure limits

Exposure limits	Ingredient name
None.	

Biological exposure indices

Exposure indices	Ingredient name
None known.	

Use only with adequate ventilation. If user operations generate dust, fumes, gas, vapor or mist, use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. : **Appropriate engineering controls**

Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels. : **Environmental exposure controls**

Individual protection measures

Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location. : **Hygiene measures**

Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: chemical splash goggles. : **Eye/face protection**

Skin protection

Section 8. Exposure controls/personal protection

Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated.

: Hand protection

Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

: Body protection

Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

: Other skin protection

Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use.

: Respiratory protection

SECTION 9: Physical and chemical properties and safety characteristics

The conditions of measurement of all properties are at standard temperature and pressure unless otherwise indicated.

Appearance

Liquid.

: Physical state

Colorless.

: Color

Not available.

: Odor

Not available.

: Odor threshold

7.4 [25°C (77°F)]

: pH

Not available.

: Melting point/freezing point

Not available.

: Boiling point, initial boiling point, and boiling range

Not available.

: Flash point

Not available.

: Flammability

Not available.

: Lower and upper explosion limit/flammability limit

Not available.

: Vapor pressure

Not available.

: Relative vapor density

Not available.

: Relative density

Not available.

: Solubility in water

Yes.

: Miscible with water

Not applicable.

: Partition coefficient: n-octanol/water

Not available.

: Auto-ignition temperature

Not available.

: Decomposition temperature

Not available.

: Viscosity

Particle characteristics

Not applicable.

: Median particle size

Section 10. Stability and reactivity

No specific test data related to reactivity available for this product or its ingredients.	: Reactivity
The product is stable.	: Chemical stability
Under normal conditions of storage and use, hazardous reactions will not occur.	: Possibility of hazardous reactions
Keep away from heat, sparks and flame.	: Conditions to avoid
Reactive or incompatible with the following materials: oxidizing agents.	: Incompatible materials
Under normal conditions of storage and use, hazardous decomposition products should not be produced.	: Hazardous decomposition products

Section 11. Toxicological information

Information on hazard classes as defined in Regulation (EC) No 1272/2008

Acute toxicity

Not available. : **Conclusion/Summary**

Acute toxicity estimates

Not available.

Irritation/Corrosion

Causes skin irritation.

Causes serious eye irritation.

May cause respiratory irritation.

Conclusion/Summary

: **Skin**

: **Eyes**

Not available.

: **Conclusion/Summary**

Carcinogenicity

Not available.

: **Conclusion/Summary**

Reproductive toxicity

Not available.

: **Conclusion/Summary**

Teratogenicity

Not available.

: **Conclusion/Summary**

Specific target organ toxicity (single exposure)

Respiratory tract irritation	Category 3	2-amino-2-(hydroxymethyl)propane-1,3-diol hydrochloride
------------------------------	------------	---

Respiratory tract irritation	Category 3	trometamol
------------------------------	------------	------------

Specific target organ toxicity (repeated exposure)

Not available.

Aspiration hazard

Not available.

Section 11. Toxicological information

Not available.

: Information on the likely routes of exposure

Potential acute health effects

Causes serious eye irritation.

: Eye contact

May cause respiratory irritation.

: Inhalation

Causes skin irritation.

: Skin contact

No known significant effects or critical hazards.

: Ingestion

Symptoms related to the physical, chemical and toxicological characteristics

Adverse symptoms may include the following:

: Eye contact

pain or irritation

watering

redness

Adverse symptoms may include the following:

: Inhalation

respiratory tract irritation

coughing

Adverse symptoms may include the following:

: Skin contact

irritation

redness

No specific data.

: Ingestion

Delayed and immediate effects and also chronic effects from short and long term exposure

Short term exposure

Not available.

: Potential immediate effects

Not available.

: Potential delayed effects

Long term exposure

Not available.

: Potential immediate effects

Not available.

: Potential delayed effects

Potential chronic health effects

Not available.

Not available.

: Conclusion/Summary

No known significant effects or critical hazards.

: General

No known significant effects or critical hazards.

: Carcinogenicity

No known significant effects or critical hazards.

: Mutagenicity

No known significant effects or critical hazards.

: Reproductive toxicity

Information on other hazards

Endocrine disrupting properties

No known significant effects or critical hazards (Human Health).

Other information

Not available.

Section 12. Ecological information

Toxicity

Not available.

: Conclusion/Summary

Persistence and degradability

There are no data available on the mixture itself.

: Conclusion/Summary

Section 12. Ecological information

Bioaccumulative potential

Not available.

Mobility in soil

Not available.

: Soil/water partition coefficient (K_{oc})

Not available.

: Mobility

No known significant effects or critical hazards.

: Other adverse effects

Endocrine disrupting properties

No known significant effects or critical hazards (Environment).

Section 13. Disposal considerations

The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

: Disposal methods

Section 14. Transport information
